

Dear Mr. John Smith:

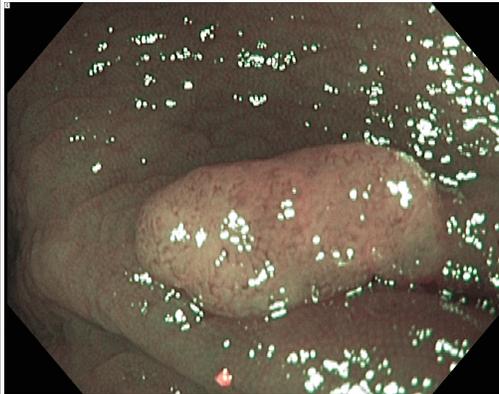

You have undergone a Colonoscopy procedure performed by Dr. William Fambord. **The summary conclusions and images from the procedure include the following:**

Summary:

- Moderately severe diverticulosis (562.10) found in the sigmoid colon.
- A single large sessile polyp was found in the ileocecal valve (211.3); removed by hot biopsy polypectomy. Chromoscopy procedure performed.

1 diverticulosis-colon-sigmoid colon

5 polyp(s)-colon-ileocecal valve

6 polyp(s)-colon-ileocecal valve

Please note the potential after effects documented in the attached Discharge Instructions sheet that you reviewed prior to the procedure.

Recommendations:

- Avoid all non-steroidal anti-inflammatory drugs (NSAID's) including but not limited to Ibuprofen, Advil, Motrin, and Nuprin for 5 days.
- Discharge home when standard parameters are met.
- Start high fiber diet.
- Colonoscopy recommended in 1 year. Patient to schedule a future appointment today.
- Follow-up on the results of the biopsy specimens in 1 week.

Reports of your procedure and these recommendations have been sent to:

- Dr. Michael Trupnick (Referring Physician)

If specimens were taken during your procedure, they may take several days to be analyzed. Call your doctor's office in ten days if you have not received your results.
